

## ScanTek4000/7000 OMR

### Overview

### Introduction

The ScanTek4000/7000 series optical mark read (OMR) scanner range are high speed compact desktop scanners from NHScantek UK weighing under 8 kgs and capable of throughput speeds of up to either 4,000 or 7,000 sheets per hour. Designed for the user who requires high processing speeds combined with accuracy, efficiency and cost-effective data capture, this versatile scanner offers a perfect solution to meet these requirements.

### Scanner Features

Features include single read head with 16 level mark discrimination facilities plus skew and double paper feed detection and optional bar code reader. Paper weight is in the range of 70-150g/m<sup>2</sup> with a sheet hopper capacity of 250 sheets (80gsm). The scanner is fully approved and compliant with the latest US and EU requirements including FCC, CE and RoHS regulations.

### Scanner Options

All Scantek OMR systems can be shipped with either **Pencil or Pen and Bubble (48 Channel/0.166")** or **Line Read (41 Channel/0.200")** Heads and with either 4,000 or 7,000 sheets per hour throughput, all subject to individual requirements. An optional bar code read head is also available, which is capable of supporting Code39, Interleaved Code 2 of 5 Code, Code128 Character Set C.
